

# How can I increase the size of the root disk of my VM running on a volume?

## Problem Description:

You are looking for information on how to increase the size of the root disk of virtual machines (VMs) running on a volume.

## Solution:

Please send an email to [cloud-support@gwdg.de](mailto:cloud-support@gwdg.de) with the UUID of the server and the UUID of the volume, which you can find at <https://cloud.gwdg.de>. Additionally, provide the desired size to which the volume should be expanded.

**Note:** The server needs to be briefly stopped by us for this.
